Yiming Che

+1(607)-338-8871 — yche1@binghamton.edu — [homepage](#) — [github](#)

PROFESSIONAL SKILLS & KNOWLEDGE

- **Programming Languages:** Python, Matlab, R

- **Skills:** Linux, Slurm, Git, MySQL, Bash script

- **Research Interests:** Generative models, Medical imaging, Bayesian statistics, Active learning

EDUCATION BACKGROUND

- **Binghamton University, State University of New York, NY, United States**
  Department of Systems Science and Industrial Engineering
  Doctor of Philosophy in Systems Science   May 2023
  Advisor: Dr. Changqing Cheng

- **Binghamton University, State University of New York, NY, United States**
  Department of Systems Science and Industrial Engineering
  Master of Science in Industrial Engineering   May 2018

- **Capital University of Economics and Business, Beijing, China**
  Department of Industrial Engineering
  Bachelor of Science in Industrial Engineering   July 2017

PROFESSIONAL EXPERIENCE

- **Postdoctoral Scholar at Arizona State University** (Advised by Dr. Teresa Wu)   2023-Present

  - **Weakly-supervised Brain Tumor Segmentation**
    - Developed a weakly-supervised brain tumor segmentation framework using diffusion models
    - Proposed a novel hyperparameter selection method without ground truth
  - **Interpretable Medical Image Classification**
    - Trying to utilizing diffusion models as interpretable medical image classifier with conterfactual
  - **Multi-modality Fusion for Headache Diagnosis**
    - Utilized CLIP model for multi-modality fusion in headache diagnosis
  - **Biomedical Age Prediction with Epigenetic Data for Alzheimer's Disease Detection**
    - Prepared NIH RO1 grant proposal
    - Utilized GAN-based model for epigenetic data translation
    - Utilized epigenetic data for biomedical age prediction

- **Research Assistant at Binghamton University** (Advised by Dr. Changqing Cheng)   2019-2023

  - **COVID Outbreak Prediction**
    - Physics-informed neural network (PINN) for the prediction of COVID outbreak
      - Included Bayesian framework in traditional PINN for robust prediction
  - **Surrogate Modeling and Active Learning/Sequential Design**
    - Developed a novel surrogate model which combines generalized polynomial chaos and stochastic kriging model for efficient surrogate modeling of stochastic systems
      - Significantly reduced computational budget and without loss of accuracy

- Developed single-section and batch-selection sampling algorithms with Gaussian process
  - Significantly reduced the size of training set for efficient surrogate modeling
- **Uncertainty Quantification for Machining Process**
  - Developed uncertainty quantification framework using generalized polynomial chaos expansion for machining process
    - Reduced computational budget of time-domain simulations for uncertainty quantification

AWARD & HONOR

- 2023 Distinguished Dissertation Award, Binghamton University   2024
- Excellence in Systems Science Research Award, Binghamton University   2023
- Graduate School Travel Grant, Binghamton University   2022
- INFORMS Bonder Foundation Award   2021
- Finalist, IISE-DAIS Mobile App Competition at 2021 IISE Annual Conference and Expo   2021
- Binghamton University Graduate Student Excellence Award in Research **(top 1%)**   2021
- Travel Grant of Midwest Dynamical Systems Conference 2019, University of Illinois at Chicago   2019
- Second Place, Best Student Paper Competition at 2019 IISE Annual Conference and Expo (Healthcare track)   2019
- Honorable Mention, Binghamton University Research Day Poster Competition, 2018   2018
- National Scholarship, Capital University of Economics and Business   2015
